Professional Summary

Software engineer and product lead with experience translating customer and user workflows into requirements, building payment integrations and Java/Spring Boot services, and collaborating across engineering, design, and support. Computer Science Ph.D. candidate building a citation-grounded LLM system for cybersecurity compliance. Enjoy working directly with people to understand their problems, explain technical choices, and turn feedback into usable software.

Education

Florida International University, Miami, FL

Ph.D. candidate, Computer Science

Jan. 2022–Present; expected Dec. 2026

M.S., Computer Science

May 2020–Dec. 2021

Shanghai University, Shanghai, China

B.S., Computer Science

Sep. 2012–May 2016

Technical Skills

Programming & APIs: Java, Python, JavaScript+CSS+HTML, Spring Boot, REST APIs

Data & AI: MongoDB, SQL, data modeling, LLMs, RAG

Cloud & Systems: Docker, Azure, AWS, Linux, Git

Security: identity/access policies, PKI, Compliance (NIST SP 800-53, HIPAA, SOC2)

AI Research

ComplianceGPT: Verifiable Compliance QA

Jan. 2025–Present

Florida International University — dissertation research

- Designed a retrieval-augmented LLM system linking cybersecurity compliance claims to inspectable source evidence for traceability and failure analysis.
- Built a structured clause store from NIST OSCAL data; evaluated retrieval and answer quality using ranking, citation, and failure-mode metrics.

Engineering & Product Experience

Research Associate

Mar. 2021–Dec. 2021

Florida International University — Baby-Feed digital-health platform

- Translated healthcare and research needs into requirements, data models, software workflows, and release priorities as product manager and hands-on developer.
- Built and maintained the Java/Spring Boot backend, MongoDB database, Docker/Azure deployment, and Git workflow.
- Reviewed code and guided student teams through architecture, implementation, debugging, testing, and releases.

Early Team Member & Product/Operations Lead

Apr. 2018–Dec. 2019

Shanghai Yiguang Information Technology Co., Ltd.

- Translated customer needs and business workflows into system requirements and production releases across product design, operations, and engineering.
- Built a WeChat Mini Program e-commerce platform from 0 to 1, and integrated WeChat Pay and Alipay into customer, order, and transaction workflows.
- Developed a Java/Spring Boot SKU and inventory system connecting product, order, and payment for daily operations.

Product Manager

Oct. 2017–Mar. 2018

Beijing Century Superstar Information Technology Co., Ltd. — Shanghai, China

- Owned information and interaction design for the Xuexitong contacts module, translating support reports and user feedback into requirements and feature improvements.
- Coordinated engineering, design, and customer-support teams through discovery, implementation, review, and release.

Front-End Engineer

Jul. 2016–Sep. 2017

Shanghai AllPay Network Technology Co., Ltd. — Shanghai, China

- Developed responsive financial trade-monitoring dashboards with JavaScript and REST APIs to visualize real-time transaction data.

Security Research

Zero Trust, Cloud Security & Cybersecurity Compliance

2023–Present

Florida International University

- Built an OpenZiti-based Zero Trust prototype with identity enrollment, PKI, policy enforcement, and controlled service access.
- Studied modernization of legacy infrastructure using overlay networking and identity-centric access control; coauthored work on Zero Trust architecture and cybersecurity compliance frameworks.

Teaching & Technical Mentoring

Graduate Teaching Assistant

2022–Present

Florida International University

- Delivered lectures and labs, held office hours, and mentored Capstone I and II teams through requirements, architecture, implementation, testing, deployment, and presentations.
- Used staged milestones and design reviews to guide projects involving web/mobile applications, databases, and cloud deployment.
- Delivered lectures and hands-on labs for Software Vulnerabilities and Security in Fall 2023, supporting vulnerability analysis and secure software development.
